

The Estimated New Cancer Cases for in 2005, for selected sites, according the American Cancer Society *, is shown in the table below.

Leading Sites of New Cancer Cases—2005 Estimates* **					
In the United States			In the State of Iowa Only		
Site	Male	Female	Site	Male	Female
Prostate	232,090	0	Prostate	3.060	0
Breast	1,690	211,240	Lung	1,790	
Lung	93,010	79,560	Breast	No data	2,300
Colon/Rectum	71,820	73,470	Colon/Rectum	1,700	
Bladder	47,010	16,200	Corpus		
Corpus Uteri	0	40,880	Non-Hodgkin Lymphoma	760	
Melanoma of the Skin	33,580	26,000	Melanoma of the Skin	540	
Non-Hodgkin Lymphoma	29,070	27,320	Bladder	670	

The Estimated Cancer Deaths for 2005, according to the American Cancer Society (ACS)*, for selected sites, shown in table below.

Leading Sites of Cancer Deaths —2005 Estimates* **					
In the United States			In the State of Iowa Only		
Site	Male	Female	Site	Male	Female
Lung	90,490	73,020	Prostate	400	0
Prostate	30,350	0	Lung	1,700	
Breast	460	40,410	Breast	440	
Colon/Rectum	28,540	27,750	Colon/Rectum	660	
Ovary	0	16,210	Leukemia	310	
Pancreas	15,820	15,980	Non-Hodgkin Lymphoma	260	
Leukemia	12,540	10,030	Brain/CNS	310	

According to the American Cancer Society Facts & Figures 2005 Graphs and Figures*, the estimated leading cause of cancer death for both men and women in the year 2005 is lung cancer. Lung cancer has been the leading cause of death for both men and women since 2001 according to the ACS*.

Lung cancer has been one of the top 5 sites at the Holden Comprehensive Cancer Center*** since 1996.

*Rounded to nearest 10. Excludes basal and squamous cell skin cancers and in situ carcinomas except urinary bladder. †Estimate is 50 or fewer cases.

Note: These estimates are offered as a rough guide and should be interpreted with caution. They are calculated according to the distribution of estimated cancer deaths in 2005 by state. State estimates may not add up to US total due to rounding and exclusion of state estimates fewer than 50 cases.

**Source: Estimates of new cases are based on incidence rates from 1979 to 2001, National Cancer Institute Surveillance, Epidemiology, and End Results Program, nine oldest registries. Estimates of deaths are based on data from US Mortality Public Use Data Tapes, 1969 to 2002, National Cancer for Health Statistics, Centers for Disease Control and Prevention, 2004.
