

INSTRUCTIONS FOR RESPIRATOR (MASK) REFIT TEST

An annual respirator (mask) refit test is required if you have worn your mask within the last 12 months or as otherwise determined by the department. A mask refitting requires a 20-minute scheduled appointment with your TB screening by contacting UEHC at 319-356-3631 in your birth month. If you have had any health changes since your last fitting, a two-page questionnaire should be completed prior to your visit. The form can be printed from the UEHC website at: www.uihealthcare.com/depts/employeehealthclinic.

Contact your HR Unit Representative and/or supervisor if the mask is no longer required in your work so that this compliance can be removed from your record.
